

Lee Musgrave

Please use the best evidenced-based science for decision-making on wolf conservation and management in Washington. Wolves should be fully returned to the Washington eco-system in sustainable wolf populations. I do not favor a hunting season for wolves once they are delisted. I do support efforts by WDFW to continue to work with ranchers to support the implementation of pro-active, non-lethal methods, such as range-riding, guard dogs and hazing, to decrease wolf-livestock conflicts.
