

Ron Baer

I've been a Washington resident since 1992. I have taken a keen interest in the health and welfare of the Eastern Washington environment and its natural preservation. Many factors are impinging on the many creatures that have called our state home. One of our many incredible assets, our beautiful wolves are nearing extinction due to our inability to live in harmony with all of our wonderful species. Extinction of them would be a tragedy of the highest order. I want my children and their children to hear the wolves calling to each as long as we and they are alive. Thank you for the opportunity to hear my concerns. I know you share in many of my concerns. Please keep working hard on our behalf and the welfare of our wolves!
