

Richard Thomsem

Let us hunt them like Idaho and Montana... hunting in our state for elk and deer has been pathetic. Wolves are nothing more than killing machines, but you already know that, once the elk and deer have been depleted so will the hunters. These last few years game has been less and less... Last year spent 10 days in The woods and i saw 1 elk and 3 doe...I'm close to never hunting here and moving out of state and giving them my money.... which equals less money to your agency!
