

Randi Kyle

I suppose illegal immigrants will be your next lost souls to save. Makes no common sense to feed those that do not pay taxes or support the overall goals. Go ruin New York and California with your wolves.

I see new proposed combination license but it doesn't show a wolf tag as being part of it? That needs to be corrected for any kind of sustainable coexistence. At this pace the wolves will kill more than conservationists. I bet you will lose all out of state revenue due to these disease infested wolves running around. The success rates are dropping and so shall your revenue. I hope your jobs and careers were worth it. This will be my last year hunting this state. Far cheaper and better success rates in other states.

Oh I also see another wolf kill in Garfield county. 4 in ten months now. 7k or more of revenue lost for the ranchers from these kills. That money should come from governors salary or his side show side kick AG salary not my tax dollars for licenses.
