

## Randy Haugen

The WDFW needs a Scientific based Plan on Wolf Recovery and Numbers, Stop letting the Rich Ranchers pull you around by the noses because they lose a few cattle, A Very small % compared to other ways they lose them.. 122 Gray Wolves is a scary low number.. The State Can handle 1000 Easily if they stop killing Wolf Families for the benefit of a few Welfare Cowboys. These killings must Stop... Use Science, Not Mob rule mentality by a few Wolf Haters.
