The wolf recovery plan and the plan to reintroduce grizzly bears are bad ideas and a waste of money and resources. Wolves and Grizzlies will never be able to co exist with people ever. They are Apex predators and will take the easiest meal. That's not their fault it's how they're wired. I have seen a grizzly over in the Teanaway while riding in the back country you don't need to bring them in. In my opinion the only people who want these animals reintroduced are people who live in cities and suburbs where they don't have to deal with the issues these animals present. I wonder if the wdfw actually contacted people who would be affected and listened to what they had to say. There was a reason these animals were gotten rid of in the first place.
