

Tara Russell

Please consider the non-lethal methods of managing wolf/livestock conflicts that are offered by Defender's of Wildlife. They are ready and willing to explain and teach ranchers in Washington how to keep from killing wolves. Colorado residents are trying to vote in a Wolf Reintroduction program as we understand the benefits of a healthy ecosystem within our state.

Please protect your wolves and ensure management doesn't fall under unethical pressures by ranchers.

Thanks for the opportunity to let me comment.
