

Robert Anderson

With wolf populations growing at an estimated rate of 28% per year, it is paramount to allow them to be hunted with small game tag. Also, in the event of nuisance wolves on farm, or ranch property, wolves should be immediately eliminated. Same with wolves encroaching on city limits, or populated areas. They are an apex predator, and should be respected, but at no cost of human, or domestic animal loss. As an outdoor enthusiast i believe the animals have a right to the land, but wolves will ruthlessly kill horses, cows, sheep, dogs, etc. If not kept in check
