WDFW has identified a list of impact topics to include in the Plan/EIS. Impact topics are a means of organizing the discussion of issues and analysis of impacts. Impact topics can be thought of as chapter or section headings in the Plan/EIS.

Please review this list and add other topics, or items that fit under these headings.

Please check the topics you view as most important.

Wolf conservation and monitoring

Do you have general comments about the scope of Washington's updated wolf conservation and management plan?

I am EXTREMELY disappointed that stewardship and PROTECTIONS are not being enforced by the very agency that should be helping conserve wolf populations. A few cattle ranchers are being given preference in place of giving endangered wolves the right to exist in their own habitats. Why are you killing and wiping them out? They have been endangered and now you want to get rid of them!

We need wolves as part of the eco-system and to keep deer and other populations down.

Cattle ranchers shouldn't be mandating wildlife policy, period. They

should not be allowed to graze their cattle on public lands, period!
This is part of the problem.
