Rural

Do you identify yourself as any of the following?

Environmentalist

Outdoor Recreationist

WDFW has identified a list of impact topics to include in the Plan/EIS. Impact topics are a means of organizing the discussion of issues and analysis of impacts. Impact topics can be thought of as chapter or section headings in the Plan/EIS.

Please review this list and add other topics, or items that fit under these headings.

Please check the topics you view as most important.

Wolf conservation and monitoring

Wolf classification/status

Wolf management areas

Wolf-human interactions

Land management

Habitat connectivity

Goals objectives strategies and tasks

Costs and funding priorities

Economic analysis

Please list other topics here. The next page provides space for general comments on the scope of the plan.

Methods to prevent the Killing of wolf packs

Do you have general comments about the scope of Washington's updated wolf conservation and management plan?

Most of the wolf pack killings have occurred in one area to one rancher. It appears that the area is prime wolf habitat. Until the area is not used for livestock this will keep on happening. The plan should address how to prevent this. Including removing livestock from the area, replacing livestock with bison or other livestock that can coexist with wolves. Lets not continually kill wolf packs.

According the the WDFW 2018 Wolf Conservation and Management report. The number of confirmed livestock killings have averaged less then 10 per year and injuries less than 10 also. It seems like it would be cheaper and easier to just pay for damages than to kill wolf packs.
