**Do you have general comments about the scope of Washington's updated wolf conservation and management plan?**

I recommend that the state not rush to delist, focusing instead on restoring public trust, relying on the best available science and implementing effective non-lethal alternatives to alleviate wolf-livestock conflicts. The state should also work with federal land management agencies like the US Forest Service to reevaluate grazing allotments in prime wolf habitat – a crucial way to reduce a pattern of ongoing conflicts and wolf killings.
