**Do you have general comments about the scope of Washington's updated wolf conservation and management plan?**

The future of Washington's Ranchers, the future of Washings Ungulate population and growth, and the outdoorsmen/women, and true conservation needs to be regarded before the emotional views of the Urban-Seattle dwellers. As a hunter, we are true conservationists, we pay to play in the hunting world and the state/national trails/lands. That is our conservation money and we deserve a say before those who come from the city and leave the trash while hiking before going back to their quaint city homes.

Coexistence of wolves and ungulates can not exist without conservation of both species.
