

Selim Uzun

**What is your gender?**

Male

**Age?**

70

**County (or Counties) of Primary Residence?**

King

**Residential setting:**

Rural

**Do you identify yourself as any of the following?**

Environmentalist

**WDFW has identified a list of impact topics to include in the Plan/EIS. Impact topics are a means of organizing the discussion of issues and analysis of impacts. Impact topics can be thought of as chapter or section headings in the Plan/EIS.**

**Please review this list and add other topics, or items that fit under these headings.**

**Please check the topics you view as most important.**

Wolf conservation and monitoring

Wolf classification/status

Wolf management areas

Wolf-livestock conflicts

Wolf-ungulate interactions

Land management

**Do you have general comments about the scope of Washington's updated wolf conservation and management plan?**

Killing wolves must stop. Overpopulating and overgrazing cattle on public lands must also stop. Cattle farmers must contain their herds within their lands and keep their numbers at sustainable levels inside the perimeters of their acreage.

After all the efforts to bring a species back from the brink of extinction, only to drive them back into oblivion again makes no sense.
