Do you have general comments about the scope of Washington's updated wolf conservation and management plan?

Yes, we do not need wolves in Washington. They are going to wipe out our elk population which is already in a weakened state due to hoof rot. Come on, it doesn't take a genius to figure out this is a stupid move. Look at what has happened to other elk herds that have been decimated in Idaho and areas of Yellowstone for example. Not only that they are spreading diseases and also are not even the native wolf, but a much larger and more aggressive Canadian wolf.
