Suppression of the cruel inhumane factory farming of our fellow creatures, largely practiced by less educated segments of our society.

Do you have general comments about the scope of Washington's updated wolf conservation and management plan?

It's not clear that Washington's updated wolf conservation and management plan has done anything positive for our environment. It does seem clear that it has facilitated and channeled the violent reaction to the presence of wolves on the part of a few rural factory farmers. The plan seems to be part of the cruel inhumane factory farming of our fellow creatures.
