Age?

71

County (or Counties) of Primary Residence?

Snohomish

Residential setting:

Urban

Do you identify yourself as any of the following?

Environmentalist

WDFW has identified a list of impact topics to include in the Plan/EIS. Impact topics are a means of organizing the discussion of issues and analysis of impacts. Impact topics can be thought of as chapter or section headings in the Plan/EIS.

Please review this list and add other topics, or items that fit under these headings.

Please check the topics you view as most important.

Wolf-livestock conflicts

Wolf hunting

Do you have general comments about the scope of Washington's updated wolf conservation and management plan?

Wolves are native animals that belong in the Washington ecosystem. Cows, sheep, goats and any other livestock species DO NOT. Livestock owners have no right to take over our PUBLIC LANDS with their personal property, and then demand that the native wildlife that live there be killed for their personal financial benefit. Overgrazing by domestic livestock has damaged the ecosystem, and the killing of native predators ON OUR PUBLIC LANDS is an atrocity !!! The farmers and ranchers should take their animals home if they don't like the wolves, and we taxpayers should stop subsidizing this outdated business.
