Do you have general comments about the scope of Washington's updated wolf conservation and management plan?

Wolves are a wonderful species of animal, and I would love it if they once again lived free in Washington state. I do not favor a hunting season on wolves, or on any species that is not hunted for food. If you are not going to eat it, then don't kill it.

Wolves might occasionally kill some livestock, but that is their nature and the ranchers should know this and accept it as a cost of doing business.
