**What is your gender?**

Female

**Age?**

63

**County (or Counties) of Primary Residence?**

LOS ANGELES

**Residential setting:**

Urban

**Do you identify yourself as any of the following?**

Environmentalist

**WDFW has identified a list of impact topics to include in the Plan/EIS. Impact topics are a means of organizing the discussion of issues and analysis of impacts. Impact topics can be thought of as chapter or section headings in the Plan/EIS.**

**Please review this list and add other topics, or items that fit under these headings.**

**Please check the topics you view as most important.**

Wolf conservation and monitoring

Wolf management areas

Wolf-livestock conflicts

Wolf-human interactions

Habitat connectivity

Information and education

Research

Reporting and evaluation

**Do you have general comments about the scope of Washington's updated wolf conservation and management plan?**

The plan should concentrate on NON LETHAL livestock predation prevention plans. When too many predations are encountered in the same public land area, livestock should no longer be allowed to graze there. Killing wolves because of livestock predation is counterproductive: it disrupts the packs and leads to further predation and does not solve the ranchers' problems. Ranchers need to educate themselves and learn to live again with these essential predators. There are plenty of non lethal management programs available for ranchers and these are highly successful in other parts of the country, so there's no reason they can't be successful in Washington too.
