Urban

WDFW has identified a list of impact topics to include in the Plan/EIS. Impact topics are a means of organizing the discussion of issues and analysis of impacts. Impact topics can be thought of as chapter or section headings in the Plan/EIS.

Please review this list and add other topics, or items that fit under these headings.

Please check the topics you view as most important.

Wolf conservation and monitoring

Wolf-livestock conflicts

Wolf hunting

Do you have general comments about the scope of Washington's updated wolf conservation and management plan?

If you keep killing the wolves, they will never recover. It is past time to stop pandering to certain producers. Producers must make a genuine effort to keep wolf/domestic animal interaction at a low level. Livestock could be moved to another area. Some producers do a good job at this but one does little to stop the loss, demanding wolves be killed. There is nothing about conservation in that plan.

And, it seems, that the only management plan is death! Maybe the WDFW could actually try just a little harder.
