**What is your gender?**

Female

**Age?**

77

**County (or Counties) of Primary Residence?**

clackamas

**Residential setting:**

Suburban

**Do you identify yourself as any of the following?**

Environmentalist

Outdoor Recreationist

**WDFW has identified a list of impact topics to include in the Plan/EIS. Impact topics are a means of organizing the discussion of issues and analysis of impacts. Impact topics can be thought of as chapter or section headings in the Plan/EIS.**

**Please review this list and add other topics, or items that fit under these headings.**

**Please check the topics you view as most important.**

Wolf conservation and monitoring

Wolf management areas

**Do you have general comments about the scope of Washington's updated wolf conservation and management plan?**

Please consider the fact that wolves are a family unit. The young do not leave the pack for at least 2 years as they are taught by the older members how to survive/ live/ etc. when a family is disrupted by random killing, the pack suffers greatly.

many times it is the largest wolf killed--thus a major teacher--so the young are left to learn on their own--NOT a good situation. Plus, when a family member is killed, the entire pack goes into a time of mourning. And, wolves mate for life--take a mate out & the remaining mate suffers terribly. sherrie
