

Jerry Matsui

What is your gender?

Male

Age?

74

County (or Counties) of Primary Residence?

King

Residential setting:

Urban

Do you identify yourself as any of the following?

Environmentalist

Hunter

WDFW has identified a list of impact topics to include in the Plan/EIS. Impact topics are a means of organizing the discussion of issues and analysis of impacts. Impact topics can be thought of as chapter or section headings in the Plan/EIS.

Please review this list and add other topics, or items that fit under these headings.

Please check the topics you view as most important.

Wolf conservation and monitoring

Wolf classification/status

Wolf management areas

Wolf-ungulate interactions

Wolf interactions with other species

Land management

Habitat connectivity

Research

Reporting and evaluation

Goals objectives strategies and tasks

Costs and funding priorities

Economic analysis

Please list other topics here. The next page provides space for general comments on the scope of the plan.

the impacts of grazing on public lands in its entirety. ban on all grazing on public lands.

Do you have general comments about the scope of Washington's updated wolf conservation and management plan?

The reintroduction of wolves into their native habitat has been one of the most successful and scientifically proven in recent history. Unfortunately WDFW's current methods are not scientific nor environmentally sound but reactive exclusively to the cattle interests and has no public benefit. The latest proposal is only a ridiculous extension of the same method with no controls. If this is the BEST that WDFW can do, then the taxpayers money should no longer be squandered in continuing to finance a department that does not exercise intelligent, scientific and environmentally sound practices in the name of the public.
