

Margaret Ely

What is your gender?

Female

Age?

55

County (or Counties) of Primary Residence?

Columbia

Residential setting:

Rural

Do you identify yourself as any of the following?

Outdoor Recreationist

WDFW has identified a list of impact topics to include in the Plan/EIS. Impact topics are a means of organizing the discussion of issues and analysis of impacts. Impact topics can be thought of as chapter or section headings in the Plan/EIS.

Please review this list and add other topics, or items that fit under these headings.

Please check the topics you view as most important.

Wolf-livestock conflicts

Wolf interactions with other species

Wolf-human interactions

Habitat connectivity

Information and education

Do you have general comments about the scope of Washington's updated wolf conservation and management plan?

Wolves should not have been on the endangered list and allowed to repopulate. They are dangerous animals attacking domestic animals, threatening farmer's livelihoods, along with decimating the elk populations of elk, deer, etc in the mountains. We have wolves in our area and they have attacked animals on family farms and gone after my pet dogs. They need to be eliminated especially when threatening people, wild and domesticated animals. Wild elk and deer populations have been going down with the threat of wolves and cougars attacking them. Cougar populations need to be reduced as well as a threat to human, wild and domesticated animals.
