WDFW has identified a list of impact topics to include in the Plan/EIS. Impact topics are a means of organizing the discussion of issues and analysis of impacts. Impact topics can be thought of as chapter or section headings in the Plan/EIS.

Please review this list and add other topics, or items that fit under these headings.

Please check the topics you view as most important.

Land management

Do you have general comments about the scope of Washington's updated wolf conservation and management plan?

WDFW should consult with the US Forest Service about eliminating private livestock grazing permits on US Forest Service grazing allotments with wolf-livestock interactions. Livestock are non-native species that have multiple adverse environmental impacts on US Forest Service land, which is owned by the public. This is a specific request to make this an alternative in the SEPA DEIS.
