**What is your gender?**

Male

**Age?**

37

**County (or Counties) of Primary Residence?**

Stevens

**Residential setting:**

Rural

**Do you identify yourself as any of the following?**

Hunter

Outdoor Recreationist

**WDFW has identified a list of impact topics to include in the Plan/EIS. Impact topics are a means of organizing the discussion of issues and analysis of impacts. Impact topics can be thought of as chapter or section headings in the Plan/EIS.**

**Please review this list and add other topics, or items that fit under these headings.**

**Please check the topics you view as most important.**

Wolf conservation and monitoring

Wolf classification/status

Wolf management areas

Wolf-livestock conflicts

Wolf-ungulate interactions

Wolf interactions with other species

Wolf-human interactions

Wolf hunting

**Do you have general comments about the scope of Washington's updated wolf conservation and management plan?**

Wolf Population in Stevens County needs to be reduced, the conflict between ranchers livestock and wolves is getting out of control, let alone the impact on ungulate population with the increase of other predation. Wolf numbers could be managed in a more economical way for WDFW if they would let hunters buy tags and hunt them. This would drive wolves further back into the back country where they belong and put a little fear in them from being around humans and ranches. Right now there is no fear in many of the packs and they are interacting to closely with humans and live stock. We must get on top of this before it gets even more out of control and devastates ungulate and livestock population even more. Thank You
