Wolf hunting

Do you have general comments about the scope of Washington's updated wolf conservation and management plan?

Yes, I'm curious what is the purpose of bringing wolves back? They have no natural predators and how does the state "plan" on controlling the population of wolves so they don't demolish the already weak elk and deer populations! I think there needs to be a lot more research done about how this is going to affect deer and elk populations state wide before blindly sending wolves out into the wild.
