

Hayden Symbol

What is your gender?

Male

Age?

1

County (or Counties) of Primary Residence?

Spokane

Residential setting:

Suburban

Do you identify yourself as any of the following?

Hunter

WDFW has identified a list of impact topics to include in the Plan/EIS. Impact topics are a means of organizing the discussion of issues and analysis of impacts. Impact topics can be thought of as chapter or section headings in the Plan/EIS.

Please review this list and add other topics, or items that fit under these headings.

Please check the topics you view as most important.

Wolf conservation and monitoring

Wolf classification/status

Wolf management areas

Wolf-livestock conflicts

Wolf-ungulate interactions

Wolf interactions with other species

Wolf-human interactions

Wolf hunting

Translocation

Land management

Habitat connectivity

Information and education

Research

Reporting and evaluation

Goals objectives strategies and tasks

Costs and funding priorities

Economic analysis

Do you have general comments about the scope of Washington's updated wolf conservation and management plan?

I believe that the wolf should consider a game species and should be managed as such by the state. The process of having 3 recovery is ridiculous. The North East part of the state is being run over with no way to curb the issue. The process in use to determine actual population is just random guess and low one at that. I'm watching the same process of game disappearing where it once thrive and livestock being threatened with no far concessions being thrown out way all the while my hard earned money being dispersed for stupid studies to point fingers in other directions. When tracking game in areas I've hunted for 20 it's dismissal and the predators outway the ungulates ten fold. Instead of fear of litigation and backlash for environmenilists we should put our foot down and start managing the wolf before we can't get back what we have lost if it isn't too late. Don't hold the hose while the house burns down
