**Do you have general comments about the scope of Washington's updated wolf conservation and management plan?**

I support the current plan of Fish and wildlife and I think it could even be more protective of livestock and humans.

Too many people are removed from the land and have no idea how dangerous these wolves are. They are not native to our area and kill for fun. The Governor needs to spend some time alone in the woods with a wolf pack to experience what ranchers and woodsmen do.
