**Do you have general comments about the scope of Washington's updated wolf conservation and management plan?**

I guess I don't understand why you are letting the public have input on this subject. For the most part the public is ignorant on what is going on, particularly the west-siders don't have a clue what is going on in the east-side of the state. These questions and problems should be dealt with by the game biologist and wildlife managers that are trained in the field. The same goes for hunting seasons etc. certainly not our ignorant governor and game commissioners. This is a full time job people.
