

Andrew LaMance

**What is your gender?**

Male

**Age?**

37

**County (or Counties) of Primary Residence?**

King

**Residential setting:**

Rural

**Do you identify yourself as any of the following?**

Hunter

Outdoor Recreationist

**WDFW has identified a list of impact topics to include in the Plan/EIS. Impact topics are a means of organizing the discussion of issues and analysis of impacts. Impact topics can be thought of as chapter or section headings in the Plan/EIS.**

**Please review this list and add other topics, or items that fit under these headings.**

**Please check the topics you view as most important.**

Wolf-ungulate interactions

Wolf hunting

Land management

**Do you have general comments about the scope of Washington's updated wolf conservation and management plan?**

Deer populations on NE WA are declining. I have seen it drastically over the last 4-5 years. Wolves are to blame. I think a more aggressive management with hunting seasons is in order. Of the western "wolf" states, WA is the smallest, most populated, and has the fewest ungulates yet our wolf plan suggests the opposite. Wolves in regional areas of the state are recovered but we are handcuffed by a wolf plan that views recovery at a statewide level.
