

Shannon McCauley Maple

What is your gender?

Female

Age?

47

County (or Counties) of Primary Residence?

King. Why did I put my address in if you can't collect that info?

Residential setting:

Urban

Do you identify yourself as any of the following?

Environmentalist

Outdoor Recreationist

WDFW has identified a list of impact topics to include in the Plan/EIS. Impact topics are a means of organizing the discussion of issues and analysis of impacts. Impact topics can be thought of as chapter or section headings in the Plan/EIS.

Please review this list and add other topics, or items that fit under these headings.

Please check the topics you view as most important.

Wolf conservation and monitoring

Information and education

Research

Please list other topics here. The next page provides space for general comments on the scope of the plan.

All concerns which impact the health of the ecosystem. Period. Hunters, cattle interests, and any other force working against the survival/balance of the ecosystem should be removed from the list of concerns unless it is to make both illegal.

Do you have general comments about the scope of Washington's updated wolf conservation and management plan?

The fact that one cattle business in particular, but that all of them generally are allowed to access to public land with no regards to how that is affecting the ecosystem is not just criminal, it's evil. And all y'all are complicit. A rancher should not be allowed to push his commodity into the range of known packs and then cry like a baby to fish and game who fold like they are taking his money and go out and murder apex predators that are imperative to the health of the land. Why are you rancher's hitmen? This is disgusting and preposterous. The wolves of Washington are not experiencing population numbers that are indicative of a healthy ecosystem. Are you so deficient in science or education that you don't respect the research? Or at least common sense?
