Economic analysis

Do you have general comments about the scope of Washington's updated wolf conservation and management plan?

Wolves are adversely impacting multiple facets of the local economy. Not just cattle and wildlife but the real estate industry, & timber industry as well.

Local merchants, motels, & restaurants are seeing reduced customer volumes due to the reduction of out of area hunters spending their recreational \$\$ in states not over run with wolves. It's absolutely absurd that our hunting \$ and tax dollars are being WASTED on animals that were never native to these lands. Game Dept should be ashamed of themselves for being sell outs to the bleeding heart liberals that could care less about the geographical areas being pounded by these non-native predators!
