

Steven Redman

What is your gender?

Male

Age?

50

County (or Counties) of Primary Residence?

Pierce

Residential setting:

Rural

Do you identify yourself as any of the following?

Environmentalist

Hunter

Outdoor Recreationist

WDFW has identified a list of impact topics to include in the Plan/EIS. Impact topics are a means of organizing the discussion of issues and analysis of impacts. Impact topics can be thought of as chapter or section headings in the Plan/EIS.

Please review this list and add other topics, or items that fit under these headings.

Please check the topics you view as most important.

Wolf conservation and monitoring

Wolf classification/status

Wolf management areas

Wolf interactions with other species

Land management

Habitat connectivity

Information and education

Research

Please list other topics here. The next page provides space for general comments on the scope of the plan.

Wolf as keystone species in ecosystems, control of deer & elk populations that threaten forests & farms.

Do you have general comments about the scope of Washington's updated wolf conservation and management plan?

The land needs more wolves to control deer & elk & perpetuate healthy forests farms and orchards. Wolves are keystone species that keep ecosystems healthy, and they have been a part of the land for 100's of thousands of years. Don't allow one or two industries/special interest groups to have a strangle hold on wolf recovery & management to the exclusion of other interests and values.
