Outdoor Recreationist

**WDFW has identified a list of impact topics to include in the Plan/EIS. Impact topics are a means of organizing the discussion of issues and analysis of impacts. Impact topics can be thought of as chapter or section headings in the Plan/EIS.**

**Please review this list and add other topics, or items that fit under these headings.**

**Please check the topics you view as most important.**

Wolf conservation and monitoring

Wolf classification/status

Wolf management areas

Wolf-livestock conflicts

Land management

Information and education

Research

Goals objectives strategies and tasks

**Do you have general comments about the scope of Washington's updated wolf conservation and management plan?**

Modify the new policy to include stricter regulations for the livestock producer, and enforce those regulations diligently. The incident in May 2019 of wolves denning on a USFS allotment and the steps taken by WDFW, the producer and USFS is exemplary!! The producers purposefully teamed up with each other and eventually the USFS offered the Big Valley Unit as emergency pasture, these producers actually delayed turning out livestock to that grazing area! The CRM process worked and that should be a requirement to obtain grazing rights. The use of lethal methods of solving wolf-livestock conflict has been proven wrong. The people of Washington overwhelmingly feel this way. Governor Inslee agrees. Please do not be influenced by big producers like the Diamond M ranch!! Their efforts to eliminate the Gray Wolf should be penalized and manipulation of the current policy be eliminated.  
Thanks, KJ
