Do you have general comments about the scope of Washington's updated wolf conservation and management plan?

Wolves have decimated the deer herds in Ferry County and are now attacking livestock, family pets, and even treeing hikers. They are NOT a benefit to our environment, and they need to be removed or sharply controlled so that the deer can recover, and to prevent additional harm to livestock and people. This has been a terrible experiment and the people who live in rural communities or visit our forests have been highly impacted. Please bring the wolf populations under control, preferably by removing them entirely.
