Protection of wolves

**Do you have general comments about the scope of Washington's updated wolf conservation and management plan?**

Washington should be more wolf friendly and not take only the side of ranchers. Many farmers are using a non-lethal approach to handle wolf/cattle altercations and this should be the first and only defense aside from having cattle graze elsewhere. Once wolves are gone they are gone for good! We cannot simply resort to killing them at the whim of wolf hating farmers and ranchers!
