

MARVIN LILLQUIST

What is your gender?

Male

Age?

60

County (or Counties) of Primary Residence?

SNOHOMISH

Residential setting:

Suburban

Do you identify yourself as any of the following?

Environmentalist

Hunter

Outdoor Recreationist

WDFW has identified a list of impact topics to include in the Plan/EIS. Impact topics are a means of organizing the discussion of issues and analysis of impacts. Impact topics can be thought of as chapter or section headings in the Plan/EIS.

Please review this list and add other topics, or items that fit under these headings.

Please check the topics you view as most important.

Wolf classification/status

Wolf management areas

Wolf-livestock conflicts

Wolf-ungulate interactions

Wolf interactions with other species

Wolf-human interactions

Wolf hunting

Land management

Information and education

Reporting and evaluation

Goals objectives strategies and tasks

Costs and funding priorities

Economic analysis

Do you have general comments about the scope of Washington's updated wolf conservation and management plan?

When this started I was ok with wolves in our state even though I know many who disagreed with me. I thought their fears were unwarranted. However I have to admit I was wrong. I know of aggressive encounters and have had a pair flank me as I was hiking to my vehicle at sunset. I have seen 5 wolves in 4 years. 4 of them in the last 2 years. 1 of them in the palouse while pheasant hunting, within 200yds and it did not run away. 17 yrs to draw a quality deer tag and I saw more wolves than trophy bucks in 3 weeks hunting I was told I must report wolf sightings in the county I saw them and was told it was probably a coyote. Coyotes run away. I am concerned about the safety of my family and pets while enjoying the outdoors in Washington as well as diminished opportunity for a quality outdoor experience while hunting. Please manage the wolves before the opportunity is lost. Predators are getting out of control and wolves effect cougars as they steal cat kills and force cats to kill more than they would if this was not the case. Thanks
