Urban

Do you identify yourself as any of the following?

Environmentalist

Outdoor Recreationist

WDFW has identified a list of impact topics to include in the Plan/EIS. Impact topics are a means of organizing the discussion of issues and analysis of impacts. Impact topics can be thought of as chapter or section headings in the Plan/EIS.

Please review this list and add other topics, or items that fit under these headings.

Please check the topics you view as most important.

Wolf conservation and monitoring

Wolf classification/status

Wolf management areas

Wolf-livestock conflicts

Wolf-ungulate interactions

Wolf interactions with other species

Wolf-human interactions

Wolf hunting

Translocation

Land management

Habitat connectivity

Information and education

Research

Reporting and evaluation

Goals objectives strategies and tasks

Costs and funding priorities

Do you have general comments about the scope of Washington's updated wolf conservation and management plan?

My comment is centered around the use of inhumane tactics on wildlife and wolves in particular and the hunting of wolves. Wolves are an important and necessary part of the eco-system. Trapping, shooting and other means of killing should not be employed. Wolves should also not be hunted. We did not recover them only to kill and eliminate them. Also, The ranchers should not be allowed to graze their cattle on public land! This allowance demonstrates a preference for ranchers and their wants. And what they want is to 1.)let their cattle graze and use public land 2.) kill what they perceive as a threat to their livestock without knowing all the facts. Please make the Wolf Management Advisory Committee more equitable.
