

Randy Farr

**What is your gender?**

Male

**Age?**

54

**County (or Counties) of Primary Residence?**

Whitman

**Residential setting:**

Rural

**Do you identify yourself as any of the following?**

Hunter

Livestock Producer

Outdoor Recreationist

**WDFW has identified a list of impact topics to include in the Plan/EIS. Impact topics are a means of organizing the discussion of issues and analysis of impacts. Impact topics can be thought of as chapter or section headings in the Plan/EIS.**

**Please review this list and add other topics, or items that fit under these headings.**

**Please check the topics you view as most important.**

Wolf-livestock conflicts

Wolf interactions with other species

**Do you have general comments about the scope of Washington's updated wolf conservation and management plan?**

As wolf populations increase the wildlife decreases. hunter success rates are declining in areas where wolves are increasing. I personally know of people not buying hunting licenses because the game animals are declining. In the future why would hunters buy a license if they know there is no chance of seeing anything to hunt. These wolves that were introduced are not the native wolves that was originally here. Livestock owners are loosing money because of the mistakes of people that don't have to deal with the problem.
