Subject: I support Movi testing
Date: Friday, October 30, 2020 8:50:44 AM

Hi my name is Dana Williams and I live in Cantwell, Alaska. I have been flying with my husband in the Alaska Range for 18 years doing wild life survey work, pleasure flying and hunting. We have seen a decrease in the sheep population locally over the last few years and a drastic decrease especially after this past winter. The wild sheep population is struggling for a variety of reasons and adding a preventable infectious disease to that is not tolerable. I am writing in SUPPORT of Movi testing of all domestic sheep and goats regardless of age prior to import in Alaska. I support Movi testing through AAVLD accredited diagnostic laboratories and I support adding Movi to the Reportable Disease List and requiring same day reporting. It's the least we can do to protect Alaska's Wild Sheep.

Thanks,

Dana Williams
