Subject: Movi Testing of Domestic Stock
Date: Thursday, October 29, 2020 1:11:22 PM

Hello,

My name is Russ Porter and I live in Anchorage, Alaska. One of the numerous reasons I live in Alaska is the proximity and availability of hunting and fishing opportunity. Not only do I enjoy the act of hunting and fishing, but I use the meat to feed my family throughout the year. Dall sheep, mountain goats, and other mountain areas are particularly dear to my heart, as I treasure my time in the mountains hunting and observing these animals with my family. I strongly support Movi testing of **ALL** domestic sheep and goats regardless of age prior to import into Alaska. I strongly support Movi testing through AAVLD accredited diagnostic laboratories. And I strongly support adding Movi to the Reportable Disease List and requiring same-day reporting.

I urge you to move forward with the above-mentioned recommendations. Even a single domestic animal carrying Movi is too great of a threat to Alaska's Dall sheep, mountain goats, and muskox. Our country and the rest of the world have spent most of this year experiencing exactly what can happen when a single individual contracts a contagious disease. Now is the time for Alaska to take steps to protect wildlife within the state!

Thanks,

Russ Porter, P.E.
