

# Rustin Krafft

Protecting Alaska's wild sheep is critical.

To help protect our wild stocks, Movi testing **MUST** be accomplished on all domestic sheep and goats regardless of age prior to import into Alaska

Movi testing must be done through AAVLD accredited diagnostic laboratories

Movi must be added to the Reportable Disease List and require same-day reporting

Thanks you for your attention and I urge you to make the right decision. Failure to stop the spread will result in the loss of wild sheep in Alaska, never to return again.
