

Jeremy Lee

I endorse the selling of raw milk and raw dairy products. I grew up next to a dairy farm and drank raw milk as a child. It is super healthy for most. I attribute the availability in my youth of raw milk to my healthy foundation now as an adult of 50 years. I still drink as close to raw as I can currently obtain. It would be great to pick it up at Fred Meyers now! Please do it. Dont allow the Fed to tell us what we can or can't put in OUR bodies. They work for us and not the other way around. We need to push back every single one of these Federal government over reaches.
