

Carl Jennings

I am writing in support of the Intended Use Plan for the Kotzebue Fire Hall Lift Station and Sewer System - Replace sections of existing gravity main with 8-inch insulated pipe, replace the existing Fire Hall Lift Station, construct an additional 8-inch insulated arctic force main to allow for increased capacity in transmission of wastewater to Lagoon Cell 1 from existing lift stations. This work will ensure the viability of our in ground existing infrastructure to allow us to continue to provide sewer services to all of the community, it will also ensure that our Fire Hall has an operational lift station to remove waste from the facility, the existing lift station has been in dire need of replacement with a better design and improved functionality. Thank you again for considering this much needed work.

Respectfully,

Carl D Jennings
Public Works Director
City of Kotzebue
