

## James Roza

I suggested to the DEC & the company SST to move the soil remediation facility to a state burn site on Robert Walker Ave, by the 100 acre gravel pit in Nikiski, by Agrium, across from the gas station. All the houses are gone. The state owns the 1100 or so acres now. They could maybe work off Rig Tenders' dock and stay in the industrial area, instead of being in the residential area.
