Please do not add any more challenges to an already bloated bureaucracy. If this is the place we live, then adding in documentation from Washington D.C. is not required. Please do not reference any Federal Regulations. Keep it local and have the people that live in that community form an organic group to address local concerns. This former military district of Alaska did not allow counties nor local organic governments. We were forced into these Boroughs through the Mandatory Borough Act. We need less government not more.

Juneau has nothing to do with Anchorage who has nothing to do with Fairbanks who has nothing to do with Adak. Let those who live there make their own community agreements by voluntary initiative.

This whole organization focuses on a Czarist Russia central control structure that is not going to help people form communities where they choose how they want to deal with local concerns as opposed to being dictated to by Juneau.
