Table 1.0: Request for Additional Information on Trident Seafoods Corporation ODPCP (21-CP-5185)

#	Page	Section	Regulation 18 AAC 75.###	Comment/Recommendation	Plan Holder Response
1.	1-4	1		The figure depicts the four Area Contingency Plan boundaries and the 10 geographic zones, not the ADEC Regional Response Team Areas of Coverage. Please relabel.	
2.	1-C-1	1		Please delete "1.907.786.3483 (alt)" from the U.S. Fish and Wildlife Service row. It is no longer used. Consider adding their spill response email address: fwsakspillresponse@fws.gov.	
3.	1-K-5, 1- K-8, 1- K-26, 1- K-28, 1- L-10, and 1-L- 21	1		Protection of Sensitive Resources or Environmental Unit rows: Please change all uses of "Wildlife <u>Protection Plan"</u> to "Wildlife <u>Response</u> Plan" so the terminology is consistent with the <i>Wildlife Protection Guidelines for Oil</i> Spill Response in Alaska (WPG). For the General Response Objectives & Strategies tables, consider further revising the bullets to "Protect wildlife resources by developing and implementing Wildlife Response Plan."	
4.	1-K-8, 1- K-26, 1- L-21	1		Scenarios 1, 2, and 3: Containment, Control & Recovery: 4th bullet: Recommend moving this bullet to the Protection of Sensitive Resources row and changing "wildlife hazing" to "wildlife response" so activities other than just hazing are included. Protection of Sensitive Resources: The "T" in SCAT is for "Technique" not "Team" - please correct. This error occurs multiple other places in the plan. Please check entire document and correct as needed.	
5.	1-K-10	1		5-12 hrs	

Page 1 of 8

Table 1.0: Request for Additional Information on Trident Seafoods Corporation ODPCP (21-CP-5185)

#	Page	Section	Regulation 18 AAC 75.###	Comment/Recommendation	Plan Holder Response
				SCAT Team 1 states "Conduct Scat, report findings to OSC." However, it seems unlikely that SCAT teams would be mobilized to the site, have time to conduct a SCAT survey, and complete a report of their findings within 5-12 hours of the spill. Is SCAT Team 1 conducting shoreline reconnaissance instead of SCAT surveys?	
				The bottom of this table is cut off for the 5-12 hrs column.	
6.	1-K-10, 1-K-13, 1-K-37, 1-K-40, 1-K-43, 1-L-24, 1-L-32, 1-L-36, 1-L-40, 1-L-44	1		The plan indicates that ACN or SEAPRO equipment and personnel will be mobilized for SCAT task forces. However, SCAT teams are typically comprised of multiple state and federal agencies and a responsible party representative, not PRAC personnel. It is understood that PRAC personnel may conduct shoreline assessments/reconnaissance (aerial, foot, or vessel based observations) prior to SCAT teams arriving and conducting SCAT surveys, but wording elsewhere in the plan indicates that SCAT reports are used to inform shoreline cleanup operations and that implies something more involved than shoreline assessment/reconnaissance. Please reconcile. Table 2 on page 1-K-40 appears mislabed. Should it be Table 4?	
7.	1-K-46	1		In the 36 – 48 hrs column, the last team is called SCAT Teams 1 & 2 but the activities listed are for "shoreline recovery" not SCAT operations. Please reconcile.	
8.	1-K-14, 1-K-38, 1-K-41, 1-K-44,	1		Wildlife Teams: The plan states "Active in progress (Permit Approved)Conduct hazing/bird recovery/rehabilitation as needed and as directed." If bird recovery/ rehabilitation is	

Page 2 of 8 September 10, 2021

Table 1.0: Request for Additional Information on Trident Seafoods Corporation ODPCP (21-CP-5185)

			Regulation		
#	Page	Section	18 AAC 75.###	Comment/Recommendation	Plan Holder Response
	1-K-47,			needed, these activities would require the mobilization	
	1-L-29,			of ACN's or SEAPRO's subcontractor, International	
	1-L-33,			Bird Rescue. Likewise, if marine mammal hazing or	
	1-L-37,			capture and rehabilitations is needed, this would	
	1-L-41,			require the mobilization of ACN's subcontractor,	
	1-L-45			Alaska SeaLife Center (SEAPRO's Technical Manual	
				does not indicate a contract with a marine mammal	
				wildlife response organization). Therefore,	
				recommend the following (or similar) edit:	
				"Active in progress (Permit Approved for bird	
				hazing). As needed, wildlife contractors will be	
				mobilized to the site and permits/authorizations will	
				be obtained for additional wildlife response activities."	
9.	All	1		None of the scenarios identify specific	
	scenario			Environmentally Sensitive Areas or Areas of Public	
	pages			Concern at the scenario locations, nor do they include	
				maps of response actions (e.g., where boom is placed	
				to contain spill or protect sensitive areas). Recommend	
				including.	
10.	All	1		For the Operations Section, the General Response	
	scenarios			Objectives & Strategies tables do not include	
				information on all of the task forces that are shown in	
				the Response Resource Mobilization Charts. For	
				example, the mobilization charts include task forces	
				for SCAT, Shoreline Recovery, Wildlife, Air Ops, and	
				Waste but the objectives and strategies of these task	
				forces are not evident in the General Response	
				Objectives & Strategies tables.	
11.	1-K-37,	1		6-12 hrs column and 12-24 hours column:	
	1-K-40			The plan states that Shoreline Recovery Teams 1 and 2	
				will be directed by the SCAT report. However, it is	
				unlikely that a SCAT team will have already mobilized	
				to the site, conducted SCAT surveys, and documented	
				their findings in a report by hours 6-12 or even 12-24	

Page 3 of 8

Table 1.0: Request for Additional Information on Trident Seafoods Corporation ODPCP (21-CP-5185)

#	Page	Section	Regulation 18 AAC 75.###	Comment/Recommendation	Plan Holder Response
				hours on day 1. Should day 1 teams instead be directed by shoreline reconnaissance efforts, as indicated in SCAT Teams 1 & 2?	•
12.	1-K-1 through 1-K-51	1		The hose separation scenario in St Paul and the Southeast Alaska Scenario are both Part K (the Response Planning Standard Western Alaska scenario is labeled Part L). Consider separating the first two scenarios into different parts for the ease of the reader.	
13.	1-L-4 through 1-L-7	1		There appears to be two figures with a +12 Hours trajectory and two figures with a +48 Hours trajectory. Should one of each of these be a different time after the release?	
14.	1-L-10	1		Environmental Unit row: Recommend adding "Identify & Prioritize Sensitive Areas (ICS-232)" to the 0 - 6 hrs column because this will also help inform what permits and applications might be needed.	
15.	1-L-12	1		Logistics Section, 6 - 12 hrs: Consider moving "Activate Wildlife Response Plan" to the Operations Section table because this section is responsible for implementing the plan in the field. The Logistics Section is more likely to mobilize wildlife response contractors to facilitate implementing the Wildlife Response Plan.	
16.	1-L-14 and 1-L- 18	1		Planning Section, Environmental Unit: All four rows in both tables include wording to "follow," "implement," or "continue ops" for the Wildlife Response Plan but those activities are carried out by the Operations Section. Consider changing the wording to something such as "Review and update Wildlife Response Plan" for the Environmental Unit information.	
17.	1-L-22	1		Second bullet in last row:	

Page 4 of 8

Table 1.0: Request for Additional Information on Trident Seafoods Corporation ODPCP (21-CP-5185)

#	Page	Section	Regulation 18 AAC 75.###	Comment/Recommendation	Plan Holder Response
				Consider revising the Option 1 column to something else, such as <i>new fixed facility</i> or <i>other outside contractors</i> because IBR uses its fixed facility in Anchorage for the cleaning and rehabilitation of birds. Temporary stabilization facilities will be set up as needed in remote areas for birds, but then they are transported to Anchorage for cleaning and rehabilitation. At minimum, the Availability row for this column should be modified to reflect this information. Age & Condition and Existing column: It is unclear which "Team" and "mobile unit" is being referred to in this cell. Please add clarifying information.	
				Environmental Impacts and Option 1: The information provided in this cell does not address Environmental Impacts. Also, IBR has successfully stabilized birds in the field then transported them long distances to their fixed facility in Anchorage for cleaning and rehabilitation, so that information is incorrect.	
24.	4-H-2 (page number is repeated)	4		BAT text: The ASLC does not provide treatment and rehabilitation for oiled birds. Please delete. The plan states "SEAPRO have a connection to International Wildlife Research (IWR)." but it is unclear what this means. Will IWR be mobilized by SEAPRO for sea otter response? Will additional wildlife contractors be mobilized for marine mammals other than sea otters if needed?
