

Kaci Gillham

Hello,

I am very concerned about soil, water and air contamination by the proposed facility. It is too close to homes, the school and the highway. I own property in Nikiski and plan to build a home there, with children who will be at that school, traveling the highway and drinking the water.

As I understand there are alternative locations available to use that are not near homes, school and the highway and are better set up. Yes, using these will cost us more in transport but it is worth it to keep our air, soil and water in its current condition.

Please think of our children.

Thank you,

Kaci
