I have been against this since I found out a few months back. There are plenty of other places in Nikiski where it is not this close to residential homes. We are not zoned out here, but putting this site close to people's homes is ridiculous! There is also a high school not far from the site and the bike path that is across the road is used constantly by kids and adults. This to me is a no Brainer! Please do not allow this to happen to my community.
