

STT Soil Burning Remediation Plant re-location

Petition

The reason for this petition is to change the location of the proposed STT dirt burner site. The location chosen Mile 27.4 is in close proximity to the high school, aquifers, residences, the Clamery and the bike path. The STT dirt burner will put off gasses like SO2 into the air which will contaminate water aquifers and wells; SO2 is not safe for humans, animals or plants. We believe a remote area in Nikiski is better suited for this site.
