1   STEVE PANNONE: Good evening. My

 2   name is Steve Pannone. That's P-A-N-N-O-N-E. I'm

 3   with Pannone Engineering Services in Palmer.

 4   My comment is I think this code

 5   rewrite and this public meeting was poorly

 6   advertised, and I didn't know about it until I was

 7   informed that there was even a phone call and a

 8   public hearing this evening. And I think taking

 9   information that was presented five years ago,

10   rewriting things for five years, and then

11   presenting it and not even publicly presenting it

12   to all the industry that is actually involved in

13   rewriting -- or actually implementing these codes

14   and designing per these codes, it just doesn't make

15   sense to me.

16   I believe that we need to have a

17   regroup with this, get together with industry and

18   the regulators and review this and put our heads

19   together to write a code that is actually going to

20   work and that will apply for both the engineers

21   designing this as well as the regulators regulating

22   it.

23   Thank you. That's all I have to

say.
